[linkedin.com/in/benny-ngo01](https://www.linkedin.com/in/benny-ngo01) | US Citizen in Santa Clara, CA

EDUCATION

- | | |
|--|--------------------------|
| Georgia Institute of Technology
<i>M.S., Computer Science (Specialization in Artificial Intelligence)</i> | May 2028
Atlanta, GA |
| San Jose State University
<i>B.S., Computer Science GPA: 3.83</i> | May 2025
San Jose, CA |
| – Relevant Coursework: Data Structures and Algorithms, Object-Oriented Design, Software Engineering, Operating Systems, Information Security, Database Management Systems, Machine Learning, Artificial Intelligence | |

PROJECTS

- | | |
|--|---------------------|
| UFC Win Predictor Model <i>Python, Flask, scikit-learn, XGBoost, Pandas, Docker</i> | July 2026 – Present |
| – Built a leakage-safe pre-fight modeling pipeline with chronological feature freezing, calibration, and gated logistic/XGBoost selection; achieved 0.684 ROC-AUC and 0.052 ECE on 492 held-out bouts. | |
| – Shipped a responsive full-card dashboard and 12-endpoint JSON API with cached/resumable ingestion, card synchronization, versioned model bundles, and automated validation checks. | |
| Live NBA Win Probability Model <i>Python, Flask, scikit-learn, Pandas, WebSockets</i> | June 2026 – Present |
| – Engineered an end-to-end pipeline that ingested 6,562 NBA games and generated live win probabilities from score, time, possession, and leakage-safe pregame features. | |
| – Built a multi-game Flask/WebSocket dashboard with historical replay, pause, speed, seek, probability traces, and live game-state reconciliation. | |
| – Evaluated 627,786 untouched 2025–26 snapshots, achieving a 0.148 Brier score and 0.014 expected calibration error; added CI tests and checksum-gated model promotion. | |

EXPERIENCE

- | | |
|--|----------------------|
| Computer Science Tutor
<i>San Jose State University</i> | Jan 2025 – May 2025 |
| – Provided one-on-one and group tutoring for data structures and introductory programming. | |
| – Explained programming fundamentals and helped students debug code and strengthen logic. | |
| Python Instructor
<i>Futurebytes</i> | June 2024 – Aug 2024 |
| – Delivered Python instruction across foundational and advanced topics for students with varied experience levels. | |
| – Developed curriculum materials, exercises, and projects tailored to student needs. | |
| – Contributed to an increase in enrollment through positive student and parent feedback. | |

TECHNICAL SKILLS

Languages: Python, Java, C++, C#, SQL, HTML, CSS, JavaScript, TypeScript
Frameworks: Flask, React, Next.js, Tailwind CSS, Node.js
Data/ML: Pandas, NumPy, scikit-learn, PyTorch, XGBoost, Matplotlib
Databases/Tools: MySQL, PostgreSQL, SQLite, Git, GitHub, Docker, Vercel
AI: LLM integration (OpenAI APIs), RAG pipelines, AI agents(Claude Code, Codex), MCP servers, prompt engineering, agent skills, vector databases

AWARDS & LEADERSHIP

- | | |
|--|----------|
| Eagle Scout , Scouting America (formerly Boy Scouts of America) | Dec 2021 |
|--|----------|
