# Benny Ngo

bkvngo@gmail.com | +1 (408) 857-7928 | linkedin.com/in/benny-ngo01
github.com/NgoBenny | Portfolio | Santa Clara, CA | U.S. Citizen

## Education

**Georgia Institute of Technology** May 2028
*M.S., Computer Science | GPA: 4.00* *Atlanta, GA*

**San Jose State University** May 2025
*B.S., Computer Science | GPA: 3.83* *San Jose, CA*

- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Design, Software Engineering, Database Management Systems, Operating Systems

## Technical Skills

**Languages:** TypeScript, JavaScript, Python, C#, Java, SQL, C++

**Full Stack:** React, Next.js, Node.js, FastAPI, Flask, REST APIs, PostgreSQL, Prisma, SQLite

**Engineering & Testing:** Git, Docker, Linux, Azure, AWS, CI/CD, Playwright, Vitest, integration testing

**Data & Tools:** SQL, Pandas, NumPy, WebSockets, Claude Code, Codex

## Projects

**Common** | *TypeScript, React, Next.js, PostgreSQL, Prisma* 2026 – Present

- Built a full-stack community platform with authenticated user workflows, threaded discussions, moderation, and PostgreSQL-backed services.
- Coordinated concurrent updates using database transactions and advisory locks; wrote browser and database integration tests for access controls and edge cases.

**Job Application Copilot** | *TypeScript, React, WXT, Zod, Playwright* 2026 – Present

- Created a browser extension for repetitive application workflows, integrating site-specific adapters, validated resume data, and user-reviewed autofill.
- Resolved reactive form-state bugs and added post-fill verification plus Playwright/Vitest regression tests to catch integration failures.

**Live NBA Win Probability Model** | *Python, Flask, WebSockets, scikit-learn* 2026 – Present

- Built Python ingestion and model evaluation pipelines covering 6,562 games and 627,786 held-out snapshots, producing a calibrated live-win-probability application.
- Implemented asynchronous update handling, stale-data detection, state reconciliation, and replay-based regression tests for application reliability.

## Experience

**Computer Science Tutor** Jan 2025 – May 2025
*San Jose State University* *San Jose, CA*

- Tutored students on data structures, algorithms, object-oriented programming, SQL, and debugging; explained edge cases and tradeoffs in individual and group sessions.

**Python Instructor** June 2024 – Aug 2024
*Futurebytes* *Santa Clara, CA*

- Designed and taught hands-on Python lessons and programming projects; adapted exercises for students with varied experience levels.

## Awards & Leadership

**Eagle Scout**, Scouting America Dec 2021
